BC Technology

Relocate all electrical contacts to the rear side, eliminating front-side shading to maximize light absorption and power generation.

Anti-Shading Technology

With anti-shading technology, complex environments are no obstacle to generating more power.

Better Weather Adaptability

Excellent low light performance, lower temperature coefficients and power loss under high temperature.

Lower Power Attenuation

Anti PID and negligible LID/LeTID attenuation, which can reduce power loss.

Ideal Choice For Utility Project

Lower BOS cost, lower LCOE, and improved ROI.
